

We are honoured that you have decided the acquisition of an exclusive and fully handmade Persono mattress, one of the most advanced European products.  
Persono knows that choosing a mattress is one of the most important decisions we make.

## HOW TO CARE FOR YOUR MATTRESS AND TERMS OF USE

- Your mattress is delivered inside a plastic bag, which we recommend to be removed, as soon as possible. Ventilate the bedroom so that the odor, concentrated in the plastic bag, disappears;
- Your new mattress should be installed on a bed or a sommier with a bed frame of blades, preferably in wood. Never place it on a damaged or completely close surface, as it prevents air circulation and moisture can accumulate;
- It is very important to keep the bedroom well ventilated and is a good practice to leave the bed to air for some time, before making your bed in the morning;
- The Persono mattresses are entirely porous. The moisture and mold do not accumulate inside, as in conventional mattresses, for this reason, your Persono must always be ventilated;
- If you live in a very wet region, you have moved to a new house, or your body tends to perspire too much, place a blanket between the mattress and the bed frame blades, thus preventing moisture and mold to appear between the blades and the mattress. Periodically ventilate the blanket. Please note that the warranty of your mattress does not cover damage due to moisture, as they are not related to manufacturing defects, unless if detected during the first 30 days of use;
- Keep your mattress covered. A waterproof protective cover is the best way to maintain the hygiene of your mattress;
- The outer cover of your mattress is removable; It is advisable to wash it at least once a year. The covers are produced applying one or two zippers, always with a splitter, which means that the two halves separate easily and can, therefore, be washed one at a time in a standard domestic washing machine. Follow the washing instructions on the label inside;
- When removing the outer cover of your mattress will be visible the inner cover of protection to the core. In any case this cover should be removed;
- During the use of your mattress there is, sometimes, a slight compression of the materials that compose it. This is normal, verifying an adaptation to the contours of your body;
- Do not expose your mattress to the sun;
- Remember that a mattress in poor condition is a health risk;
- To increase the durability of your mattress, you should flip or rotate it every quarter, alternating the axis of movement. This measure promotes a more homogeneous distribution of the loads, thus extending the life and comfort of your mattress;

- All Persono Glamour Concept mattresses are provided with three sheets and two mattress protectors. If you want we can adapt with zippers four of your actual bottom sheets. The protective cover and the sheet shall only be use on the surface you are sleeping and never on the opposite side. When you turn the mattress, remove the protective cover and the sheet to the other side. The protective cover is waterproof and the bottom of your mattress needs to breathe;
- The protective cover must be inserted in the first zipper. Then insert the sheet in the second one around the mattress covering the entire surface of the mattress and the protective cover (even if you do not use the protective cover, always insert the bottom sheet in the second zipper);
- To wash the sheet and the protective cover you only need to open the zippers and remove to wash according to the washing instructions in the label;
- To make easier the placement of the sheet and the protective cover on the mattress, please use one hand to move the zipper's slider body and with the other hand stretch the sheet or protective cover to help the slide;

- After washing may be a slight shrinkage of the sheet, it is necessary to be more careful, helping the zipper to slide. The sheet is stretched and you don't need ironing;
- If you need to wash the mattress cover, first remove both the protective cover and the sheet, and wash them separately.

## GUARANTEE

Persono ensures that the materials used in the manufacture of mattresses are of the highest quality, the final product being guaranteed for a period indicated below, regarding to all the production faults or defects if those were not caused by improper use of the product, dirt or damage caused by fire, water or other external agents.

### Conditions

The mattresses manufactured by Persono have a 5 year guarantee on the following conditions:

During the first two years Persono will repair, free of charge, all types of defects in the mattress, due to workmanship or abnormal deformation of the inside of your mattress, since this has been used correctly with a suitable and in good condition bed frame.

From the third year until the fifth year from the date of acquisition, Persono will repair and / or replace the defective product, invoicing 1/5 of the price of it in the 3<sup>rd</sup> year, 2/5 in the 4<sup>th</sup> year and 3/5 in 5<sup>th</sup> year, by the last price list.

In case of return, the mattress should be sent to Persono in a perfect state of cleanliness. The dirty products will be refused.

We reserve the right to repair or replace a defective mattress. In case of exchange, if the model is no longer manufactured, this will be replaced by an equivalent or higher level model.

## Exclusions

- Are excluded from the guarantee all products with dirt, stains or spots;
- The guarantee does not cover damage by misuse, by accidents, mishandling, by use of excessive weight or load, by repairs made by the consumer or a third party and for any abnormal phenomenon of moisture or heat;
- The outer cover and its components are excluded from this guarantee, as its good condition depends solely on an appropriate use; Except in the case that it have already come into your possession defective, in which case such defects must be reported to us within 30 days after delivery;
- If you have any problems with moisture, after a period of 30 days, it is concluded that they do not originate from a manufacturing defect, but from a misuse of the product. (Please read the recommendations to avoid these problems);
- The materials that constitute its mattress can, during use, undergo a slight compression. This compression is normal, and if not exceed 10% of the height of the mattress, it remains within the limits of tolerance and does not justify a claim under this warranty;
- According to BS EN 1334:1996, the length, width and thickness of the mattress correspond to the measures indicated in the invoice, with a tolerance of + / - 2 cm for length and width and + / - 1 cm for thickness always evaluated on the longest dimension. In this way, are considered compliant mattresses with dimensions within these tolerances.

## RAW MATERIALS USED IN THE CORE AND COMFORT ZONES

### CORE

#### LATEX

- 100% Natural latex is produced in Guatemala in sustainable forest exploitation by "Rainforest-Alliance.com"
- Normal Blend
- Fire Retardant (FR)

Latex is a natural product originating from the rubber tree and is the ideal material for the construction of mattresses and pillows. We prefer latex to any other raw material due to the following main properties:

#### Self-ventilation and evaporation

As with most natural products, latex is porous, which means that it "breathes" and allows for excellent ventilation. Its structure, composed with millions of open cells, favors air circulation and evaporation of the body perspiration, thus keeping the mattress perfectly ventilated and dry.

#### Strength and durability

Proven endurance and durability through fatigue and compression tests.

#### High elasticity and flexibility

Naturally flexible, the elasticity of latex provides optimal support for every curve of the body, optimizing comfort and correct support. Avoids pressure points on the body, facilitating blood circulation. Reduces unnecessary movements while sleeping, allowing a more regenerative and quiet sleep.

#### Excellent body support and ergonomics

Providing the ideal support for the body and optimizing comfort, while keeping the back in a correct anatomical position, thus distributing weight away from the heaviest parts of the body and helping blood circulation. The correct and comfortable support for head, neck, shoulders, hips and spine. It keeps the spine in the anatomically correct position, even being a soft material.

#### Antibacterial, anti-mite and antifungal

This is a very hygienic product that does not generate dust or loose fibres, it is hypoallergenic and, naturally, prevents the appearance of bacteria, fungi and dust mites in the interior.

Persono's latex is available in three different densities, adaptable to weight and preference of each user, with the possibility of choosing between 100% natural latex, normal blend latex and fire retardant (FR) latex. The 100% Natural Latex, monozone or 7 zones, is produced in Guatemala in a sustainable forest exploitation, certified by "Rainforest-Alliance.com" and with certified emission reduction: positive carbon footprint.

The FR latex, used in the cores, contains flame retardant additives that make it suitable for sale in the UK, in accordance with BS 5852, Crib 2.

12 or 15 cm thick inner cores in 3 degrees of firmness (except model Tranquility):

- Soft

100% Natural Latex with a density of 70 kg/m<sup>3</sup>

Normal Blend Latex with a density of 60 Kg/m<sup>3</sup>

Fire Retardant Latex with a density of 74 Kg/m<sup>3</sup>

Recommended for users up to 65 kg, or body mass index (BMI) less or equal to 23, and/ or preference for smooth mattresses;

- Regular

100% Natural Latex with a density of 80 kg/m<sup>3</sup>

Normal Blend Latex with a density of 70 Kg/m<sup>3</sup>

Fire Retardant Latex with a density of 92 Kg/m<sup>3</sup>

Recommended for users weighing between 65 kg and 80 kg or body mass index (BMI) between 23 and 29 and/ or preference for average firmness mattresses;

- Firm

100% Natural Latex with a density of 90 kg/m<sup>3</sup>

Normal Blend Latex with a density of 80 Kg/m<sup>3</sup>

Fire Retardant Latex with a density of 105 Kg/m<sup>3</sup>

Recommended for users over 80 kg or body mass index (BMI) over 29 and/ or preference for mattresses with a higher degree of firmness;

18 cm thick inner core with 7 different comfort zones, available in two degrees of firmness in the Tranquility model:

Tranquility, has a thickness of 18 cm, with seven different comfort zones with different densities, for better accommodation of body curvature. It is available in the following degrees of firmness according to the weight, BMI and/or user's preference:

- Soft

100% Natural Latex with an average density of 80 Kg/m<sup>3</sup>

Normal Blend Latex with an average density of 65 Kg/m<sup>3</sup>

Recommended for users up to 75 kg, or body mass index (BMI) less or equal to 25, and/ or preference for average smooth mattresses;

- Regular

100% Natural Latex with an average density of 90 Kg/m<sup>3</sup>

Normal Blend Latex with an average density of 70 Kg/m<sup>3</sup>

Recommended for users over 75 kg, or body mass index (BMI) over 25, and/ or preference for mattresses with a higher degree of firmness;

## ENCAPSULATED POCKET SPRINGS

Encapsulated pocket springs are used in the core of the Tenderness models. It is an encapsulated pocket spring system in cylinder shaped tempered steel, individually wrapped in highly resistant, non-woven fabric pockets welded by ultrasound. The springs are about 14 cm height, with a polyurethane structure that gives the core a total height of approximately 17 cm.

Pocket springs differ from traditional coil springs due to excellent hygiene levels and independent responsiveness, offering enhanced comfort and adequate support to the body as well as great stability.

The latest step in the evolution of ultra-hygienic coil spring mattresses, available in three levels of firmness according to the weight, BMI and/or user's preference:

- Soft

1.8 mm thick steel wire arranged along the mattress allowing some flexibility – about 250 coil springs/m<sup>2</sup>. Recommended for users up to 65 kg, or body mass index (BMI) less or equal to 23, and/ or preference for smooth mattresses;

- Regular

1.8 mm thick steel wire arranged in a more concentrated way, making the mattress less flexible – about 270 coil springs/m<sup>2</sup>.

Recommended for users weighing between 65 kg and 80 kg or body mass index (BMI) between 23 and 29 and/ or preference for average firmness mattresses;

- Firm

2.0 mm thick steel wire arranged in concentrated way, making the mattress less flexible – about 270 coil springs / m<sup>2</sup>;

Recommended for users over 80 kg or body mass index (BMI) over 29 and/ or preference for mattresses with a higher degree of firmness;

## COMFORT ZONES

### MEMORY FOAM

The softest, most adaptable and responsive raw material used in mattresses industry.

The memory foam is a high technology material, with a density of 50 kg/m<sup>3</sup>, which was developed to allow relief of the pressure exerted on the body when lying on a surface.

Recognizing their unique properties, we use the memory foam in all of our models with the exception of "All I Need", "Teen" and "Angel". Allow your body a natural and stress-free rest.

We use the memory foam due to the following main properties:

#### Viscoelasticity

Its viscoelastic properties allow maximum comfort, achieved by reducing pressure on the skin, keeping it in

good condition and permitting good blood circulation. It offers excellent support for the body and ergonomics. When you lie down on a Persono mattress, on its memory foam surface, you will feel it molding completely to the contours of your body, providing profound sense of lightness that will trigger an extremely restful night;

#### Excellent body support and ergonomics

It eliminates areas of high pressure intradermally at the points of bony protusion or concentrated weight, (shoulders, shoulder blades, spine and lower back, hips and buttocks), avoiding constant position changes, tingling or numbness of arms and legs, which compromise a good night's sleep;

#### Softness and durability

When compressed, Memory foam compression yields slowly without exerting pressure, and becomes gentle. When the weight is removed, memory foam returns to its original form without deformation. Tests show that the thickness loss is less than 5% after 75,000 uses;

Due to its characteristics, we recommend using this surface during the winter.

#### MEMORY FOAM GEL FRESH

This is a variant of memory foam comprised by a thin hydrogel layer, with a density of 1000 kg/m<sup>3</sup>, injected over Memory foam. This gel, discovered through research into nanotechnology, operates by taking longer to absorb heat and therefore remains cool for a long time, lowering the temperature perceived by 3 to 4 °C. This solution is ideal for people who usually suffer from too much heat during the night. We recommend the use of this surface during the summer.

#### FIRE RETARDANT MEMORY FOAM

The Memory Foam is also available with fire retardant treatment by addition of flame retardant additives and complies with EN 1021-1 and 2.

#### CLIMALATEX / CLIMALATEX WAVE

It is an evolution of latex, extra smooth, with a density of 59 kg/m<sup>3</sup> even smoother, ventilated and extraordinarily comfortable, used in the comfort surfaces. All properties mentioned in latex are reinforced in the production of this raw material that combines durability with ventilation.

#### CLIMALATEX GRAPHITE / CLIMALATEX WAVE GRAPHITE

The Climalatex Graphite and Climalatex Wave Graphite are an evolution of Climalatex, by adding graphite, fire retardant additive, which allows them to be fireproof and are in accordance with BS 5852 Part 2.

## COVER OPTIONS

We offer several options of covers made with velvet or stretch fabrics with a smooth texture, flexible and easy to wash. The texture of the fabric eliminates the need for padding, which we only use with velvets.

All covers have Sanitized treatment, which provides antibacterial, antifungal and anti-mite protection, providing maximum comfort and improved hygiene.

All outer covers are washable, according to the washing instructions provided.

All the stretch fabrics and velvets meet the standard Oeko-Tex Standard 100 – Confidence in textiles.

The purpose of the Certificate Oeko-Tex Standard 100 "Confidence in Textiles", is to ensure that consumers have the security that Persono outer covers, are free of chemicals and harmful materials. All velvets and knitted stretch Persono have been approved in these tests.

## PADDED VELVET

When deciding which material would be best to cushion the core of your mattress, we embarked on a journey of research and innovation, which was completed when we found the ideal composition - padded velvet.

The Persono velvets Calm Pearl and Eccentric Black are hypoallergenic with silver wire Silverness giving them antibacterial, antifungal and anti-dust mite characteristics, dust repellent and promoter of static electricity discharge. It also has in its composition, Safesleep yarn, which is flame retardant in accordance with BS 7175, Crib 5.

The Turquoise Blue and Red of Roses velvets have Sanitized treatment giving them properties of prevention of allergies, antibacterial, antifungal and anti-dust mite. They also possess characteristics that give freshness and hygienic as well as fireproofing treatment in accordance with EN 597 - part 1 and 2.

All velvets have Aloe vera extract that is added as a final treatment making the fabric extremely soft and hydrated.

The velvet composition varies with its color, so you can see it on the tag attached to the cover.

The velvets are padded with polyester hollow fibers siliconized (250 g/m<sup>2</sup>), treated flame retardant and satisfy the standard EN 1021-1, 1021-2 and BS EN 5852 Part 2, and stretch mesh with a composition of 50 % cotton and 50% polyester FR treatment according to standard EN 597 part 1 and 2.

## PERSONO LUX

Stretch fabric, very soft and extremely pleasant to the touch, due to the Aloe vera treatment. It has Sanitized treatment, giving it properties of prevention of allergies, antibacterial, antifungal and anti-dust mite.

Composition: 40% Viscose, 40% Polyamide, 20% Polyester and weight of 650 g/m<sup>2</sup>.

Main features: Ability to absorb moisture, shiny and nice to the touch.

## PERSONO THERMIC

Extremely gentle and pleasant stretch fabric. The THERMIC treatment increases thermal comfort, reducing perspiration and improving quality of sleep. It has Sanitized treatment, giving it properties of prevention of allergies, antibacterial, antifungal and anti-dust mite.

Composition: 40% Viscose, 40% Polyamide, 20% Polyester and weight of 635 g/m<sup>2</sup>.

Main features: Sensation of freshness, ability to absorb moisture, shiny, nice to the touch and resilient.

## PERSONO BASIC

Stretch fabric, equally pleasant to the touch, very smooth and ventilated. It has Sanitized treatment, giving it properties of prevention of allergies, antibacterial, antifungal and anti-dust mite. Covers developed with youths and children in mind.

Composition: 38% Cotton, 36% Polyamide, 26% Polyester and weight of 350 g/m<sup>2</sup>.

Main features: Ability to absorb moisture, freshness, hygienic and hypoallergenic.

### 3D BAND

To complement the features of our Persono Luxury Concept we have inserted on the sides of the mattress a tridimensional band.

### INSIDE COVER (non-removable)

Of protection to the core in stretch mesh with a composition of 50% cotton and 50% polyester, with FR treatment in accordance with the Standard EN 597 part 1 and 2.

## MATTRESSES TECHNICAL SPECIFICATIONS

### PERSONO GLAMOUR CONCEPT

#### TRANQUILITY

- Custom-size mattress, always with an approximate thickness of 24 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 3 cm Memory Foam or Memory Foam Gel Fresh;
- Tranquility, has an 18 cm thick 100% Natural Latex core, with seven different comfort zones with an average density of 80 or 90 Kg/m<sup>3</sup> (depending on option);
- Non-removable inside cover protecting the core;
- Cover according to the option selected;
- Glamour "Built-in Sheet" concept mattresses – Are supplied with three sheets and two mattress protectors, all with adapted zippers. We can customize (zipper placement) up to four sheets of the client;
- The mattress sides, with decorative ribbons and double zipper are complemented by four pockets with MADE WITH SWAROVSKI® ELEMENTS zippers, to hold personal objects;
- Embroidered Label indicating which side to use – summer or winter – MADE WITH SWAROVSKI® ELEMENTS stone, reflecting the uniqueness and glamour of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

#### I'M IN HEAVEN

- Custom-size mattress, always with an approximate thickness of 23 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 5 cm Memory Foam or Memory Foam Gel Fresh;
- I'm in Heaven mattress, has an 15 cm thick 100% Natural Latex core, available in the following degrees of firmness: Soft (Density 70 Kg/m<sup>3</sup>), Regular (Density 80 Kg/m<sup>3</sup>) and Firm (Density 90 Kg/m<sup>3</sup>);
- Non-removable inside cover protecting the core;
- Cover according to the option selected;

- Glamour "Built-in Sheet" concept mattresses – Are supplied with three sheets and two mattress protectors, all with adapted zippers. We can customize (zipper placement) up to four sheets of the client;
- The mattress sides, with decorative ribbons and double zipper are complemented by four pockets with MADE WITH SWAROVSKI<sup>®</sup> ELEMENTS zippers, to hold personal objects;
- Embroidered Label indicating which side to use – summer or winter – MADE WITH SWAROVSKI<sup>®</sup> ELEMENTS stone, reflecting the uniqueness and glamour of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

### ALL I NEED

- Custom-size mattress, always with an approximate thickness of 20 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 2 cm Climalatex;
- All I Need mattress, has a 15 cm thick 100% Natural Latex core, available in the following degrees of firmness: Soft (Density 70 Kg/m<sup>3</sup>), Regular (Density 80 Kg/m<sup>3</sup>) and Firm (Density 90 Kg/m<sup>3</sup>);
- Non-removable inside cover protecting the core;
- Cover according to the option selected;
- Glamour "Built-in Sheet" concept mattresses – Are supplied with three sheets and two mattress protectors, all with adapted zippers. We can customize (zipper placement) up to four sheets of the client;
- The mattress sides, with decorative ribbons and double zipper are complemented by four pockets with MADE WITH SWAROVSKI<sup>®</sup> ELEMENTS zippers, to hold personal objects;
- Embroidered Label indicating which side to use – summer or winter – MADE WITH SWAROVSKI<sup>®</sup> ELEMENTS stone, reflecting the uniqueness and glamour of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

### WISH

- Round mattress with a diameter of 220 cm, always with an approximate thickness of 19 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 2 cm Climalatex and 2 cm Memory Foam or Memory Foam Gel Fresh;
- Wish mattress, has a 15 cm thick 100% Natural Latex core, available in the following degrees of firmness: Soft (Density 70 Kg/m<sup>3</sup>), Regular (Density 80 Kg/m<sup>3</sup>) and Firm (Density 90 Kg/m<sup>3</sup>);
- Non-removable inside cover protecting the core;
- Cover according to the option selected;
- Glamour "Built-in Sheet" concept mattresses – Are supplied with three sheets and two mattress protectors, all with adapted zippers. We can customize (zipper placement) up to four sheets of the client;
- The mattress sides, with decorative ribbons and double zipper are complemented by four pockets with MADE WITH SWAROVSKI<sup>®</sup> ELEMENTS zippers, to hold personal objects;
- Embroidered Label indicating which side to use – summer or winter – MADE WITH SWAROVSKI<sup>®</sup> ELEMENTS stone, reflecting the uniqueness and glamour of Persono mattresses;
- On request, we can embroider the name of the users;

## TENDERNESS

- Custom-size mattress, always with an approximate thickness of 23 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 3 cm Memory Foam or Memory Foam Gel Fresh;
- Tenderness mattress has a 17 cm thick inner pocket spring core, available in the following degrees of firmness: Soft (250 coil springs/m<sup>2</sup>; 1,8 mm thick steel wire), Regular (270 coil springs /m<sup>2</sup>; 1,8 mm thick steel wire) and Firm (270 coil springs /m<sup>2</sup>; 2,0 mm thick steel wire);
- Non-removable inside cover protecting the core;
- Cover according to the option selected;
- Glamour "Built-in Sheet" concept mattresses – Are supplied with three sheets and two mattress protectors, all with adapted zippers. We can customize (zipper placement) up to four sheets of the client;
- The mattress sides, with decorative ribbons and double zipper are complemented by four pockets with MADE WITH SWAROVSKI® ELEMENTS zippers, to hold personal objects;
- Embroidered Label indicating which side to use – summer or winter – MADE WITH SWAROVSKI® ELEMENTS stone, reflecting the uniqueness and glamour of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

## PERSONO LUXURY CONCEPT

### TRANQUILITY

- Custom-size mattress, always with an approximate thickness of 24 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 3 cm Memory Foam or Memory Foam Gel Fresh;
- Tranquility, has an 18 cm thick Normal Blend Latex core, with seven different comfort zones with an average density of 65 or 70 Kg/m<sup>3</sup> (depending on option);
- Non-removable inside cover protecting the core;
- Cover according to the option selected. Side panels with 3D bands for optimized ventilation, decorative strips, ribbons, double zipper and latch. Outer cover easily removable for washing according to the washing instructions provided;
- Embroidered Label indicating which side to use – summer or winter – with semi-precious stone inlay, reflecting the uniqueness of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

### I'M IN HEAVEN

- Custom-size mattress, always with an approximate thickness of 23 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 5 cm Memory Foam or Memory Foam Gel Fresh;
- I'm in Heaven mattress, has an 15 cm thick Normal Blend Latex core, available in the following degrees of

firmness: Soft (Density 60 Kg/m<sup>3</sup>), Regular (Density 70 Kg/m<sup>3</sup>) and Firm (Density 80 Kg/m<sup>3</sup>);

- Non-removable inside cover protecting the core;
- Cover according to the option selected. Side panels with 3D bands for optimized ventilation, decorative strips, ribbons, double zipper and latch. Outer cover easily removable for washing according to the washing instructions provided;
- Embroidered Label indicating which side to use – summer or winter – with semi-precious stone inlay, reflecting the uniqueness of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

### ALL I NEED

- Custom-size mattress, always with an approximate thickness of 20 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 2 cm Climalatex;
- All I Need mattress, has a 15 cm thick Normal Blend Latex core, available in the following degrees of firmness: Soft (Density 60 Kg/m<sup>3</sup>), Regular (Density 70 Kg/m<sup>3</sup>) and Firm (Density 80 Kg/m<sup>3</sup>);
- Non-removable inside cover protecting the core;
- Cover according to the option selected. Side panels with 3D bands for optimized ventilation, decorative strips, ribbons, double zipper and latch. Outer cover easily removable for washing according to the washing instructions provided;
- Embroidered Label indicating which side to use – summer or winter – with semi-precious stone inlay, reflecting the uniqueness of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

### WISH

- Round mattress with a diameter of 220 cm, always with an approximate thickness of 19 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 2 cm Memory Foam or Memory Foam Gel Fresh and 2 cm Climalatex;
- Wish mattress, has a 15 cm thick Normal Blend Latex core, available in the following degrees of firmness: Soft (Density 60 Kg/m<sup>3</sup>), Regular (Density 70 Kg/m<sup>3</sup>) and Firm (Density 80 Kg/m<sup>3</sup>);
- Non-removable inside cover protecting the core;
- Cover according to the option selected. Side panels with 3D bands for optimized ventilation, decorative strips, ribbons, double zipper and latch. Outer cover easily removable for washing according to the washing instructions provided;
- Embroidered Label indicating which side to use – summer or winter – with semi-precious stone inlay, reflecting the uniqueness of Persono mattresses;
- On request, we can embroider the name of the users;

### TENDERNESS

- Custom-size mattress, always with an approximate thickness of 23 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 3 cm Memory Foam or

Memory Foam Gel Fresh;

- Tenderness mattress has a 17 cm thick inner pocket spring core, available in the following degrees of firmness: Soft (250 coil springs/m<sup>2</sup>; 1,8 mm thick steel wire), Regular (270 coil springs /m<sup>2</sup>; 1,8 mm thick steel wire) and Firm (270 coil springs /m<sup>2</sup>; 2,0 mm thick steel wire);
- Non-removable inside cover protecting the core;
- Cover according to the option selected. Side panels with 3D bands for optimized ventilation, decorative strips, ribbons, double zipper and latch. Outer cover easily removable for washing according to the washing instructions provided;
- Embroidered Label indicating which side to use – summer or winter – with semi-precious stone inlay, reflecting the uniqueness of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

## PERSONO CASUAL CONCEPT

### TENDERNESS

- Custom-size mattress, always with an approximate thickness of 23 cm;
- Ergonomic and Orthopedic Mattress – Double sided: 3 cm Climalatex Wave and 3 cm Memory Foam or Memory Foam Gel Fresh;
- Tenderness mattress has a 17 cm thick inner pocket spring core, available in the following degrees of firmness: Soft (250 coil springs/m<sup>2</sup>; 1,8 mm thick steel wire), Regular (270 coil springs /m<sup>2</sup>; 1,8 mm thick steel wire) and Firm (270 coil springs /m<sup>2</sup>; 2,0 mm thick steel wire);
- Non-removable inside cover protecting the core;
- External cover according to the option selected. Side panels with decorative ribbons, single zipper and latch. Outer cover easily removable, for washing according to the washing instructions provided;
- Embroidered Label indicating which side to use – summer or winter – with semi-precious stone inlay, reflecting the uniqueness of Persono mattresses;
- On request, we can embroider the name of the users;
- Mattresses wider than 160 cm can be manufactured with two different inner sections within a single mattress cover.

### YOU AND ME

## PERSONO COMPLEMENTS

### TOPPERS

If you want to improve your nighttime comfort and further increase the quality of your rest, you can choose to add a topper to your mattress. You can choose a latex, memory foam or memory foam gel fresh core and your favorite cover fabric.

### PILLOWS

Persono knows the importance of the pillow you sleep with, and therefore offers classic or anatomical shaped, with several sizes, so that you can choose the one that best suits your needs. All models are fitted with a protective inner cover and are lined with mesh with Sanitized hypoallergenic treatment. Persono pillows are available in memory foam, latex or hollow fiber.
